

Kellogg Biological Station REU

(Research Experiences for Undergraduates)

Opportunities for 2008

Great Lakes BioEnergy Research Center REUs (Department of Energy REU)

* Biodiversity, sustainability, and ecosystem services in biofuel cropping systems (microbiology, biochemistry, and field biology)

REUs at the KBS Long Term Ecological Research Site (NSF-LTER)

**Ecological Genetics*

**Aquatic Biogeochemistry*

**Perennials in sustainable agriculture*

**Temporal variation in perennial productivity*

KBS Learn and Intern Program:

**Perennial Plant Cover in Agricultural Ecosystems*

**Parental Investment in House Wrens*

**Plant-Mycorrhizal Interactions*

**Community Ecology in Temporary Ponds*

**Integrated Food System Internship*

We also have paid internships for students that want less research and more career-related experience:

**Bird Sanctuary Student Internship*

**Crop and Dairy Internship (Feb. 28th deadline)*

**PR/Marketing Internship*

Please invite your students to visit our website for details and application forms:

<http://www.kbs.msu.edu/reu/>

Application deadlines are March 15th, unless otherwise noted.

Undergraduates at KBS will be part of a lively research community. Students will receive training in many facets of the research process, and work closely with a mentor-scientist. All these programs include a PAID stipend, and many also include room and board.

If your students have questions, please have them contact me.

Sincerely,

Gwen Pearson, PhD
Asst. Director for Education and Outreach
