May 9, 2017

Dear incoming International student and parent(s):

Welcome from the staff of the Wabash Student Health Center! We sincerely hope your Wabash experience will be a healthy one. We offer health services to the student body in our clinic on campus. We also offer sports medicine services.

In order to provide the best possible medical care to Wabash men, it is essential that we receive complete and accurate health information from each student. Please click the link for the [Student Health Record](#), print it, and fill it out completely. While we do not require that you have a physical examination prior to coming to Wabash, it is recommended for your overall health. We require that your immunizations be up to date and verified by either a physician or licensed nurse. You will NOT be allowed to register for classes this fall if we do not have a completed immunization record. We have also included information on the meningococcal meningitis vaccine. We require international students to receive a **Mantoux** tuberculosis (TB) skin test prior to coming to Wabash.

The Student Health Record should be completed and mailed to the Wabash Student Health Center by August 1. Also, you ABSOLUTELY MUST have a TB (tuberculosis) test read before leaving home and coming to campus. You cannot enroll without it!!

All varsity athletes will be required to have a physical examination performed by the college medical staff before participating in practice or competition. Your coach or the college trainers will inform you of the date of the physical for your sport.

If you take prescription medication please have your personal physician write you a prescription with enough refills to get you through the school year. If you are taking ADD/ADHD medications such as Ritalin, Concerta, Adderall, Focalin etc., we prefer that your personal physician write your prescription. We will not refill controlled substances without a signed authorization from your physician. If you wear contacts, we strongly recommend you have a backup pair of glasses in case you develop an eye infection, which may not allow the use of contact lenses for a period of time.

If you have a history of mental illness or are taking psychiatric medications we request that you contact the college nurse at 765-361-6265 or email her at <lambc@wabash.edu> well in advance of coming to school in the fall. This will allow us to determine possible at-risk students and what type of local psychiatric care you may require. The college physicians do treat mild cases of depression and there is a counseling service available on campus. The curriculum, adjustment to a new country and extra-curricular activities at Wabash can be extremely demanding and can be a strain on young men with a history of mental illness, particularly international students.

All students are required to participate in the Wabash health reimbursement program regardless of parental insurance status. If you have private health insurance, please be aware it may have a limited network of doctors or other restrictions that may not provide coverage in Crawfordsville. It is also

imperative that if you are covered by your family health insurance that you have a copy of your insurance card with you at school (please attach a photocopy of both sides of your card to your health record if possible). Our school nurse also handles all of the student health insurance issues in addition to her nursing duties.

The Student Health Center is open from 8:30 a.m. to 2:00 p.m. Monday through Friday when classes are in session. The physicians see students from 11:30 a.m. to 12:50 p.m. We ask that the students contact the health center by phone or e-mail prior to coming in to be seen. This allows us to provide enough time for the student's needs and to minimize time away from studies. We recommend that you call ahead for an appointment. Students are seen in the Health Center without charge regardless of insurance status. Laboratory tests, X-rays and any other ancillary procedures will be billed to the student's private or student health insurance.

After hours care is available on the weekends at the *Franciscan Health Weekend Clinic*, 1704 Lafayette Road, Suite 2. Hours of the Clinic are Saturday & Sunday 11:30 a.m. to 2:00 p.m. It is closed on major holidays. The Clinic is to be used only for semi-emergencies that cannot wait until Student Health Center opens on Monday. Problems outside office hours can also be directed to the private office of Drs. Douglas and Roberts at 765-362-5789, Monday – Friday 2:00pm – 5:00pm. If a student is having an emergency, call 911 or report to the Franciscan Health Hospital Emergency Department 1710 Lafayette Road (St. Rd. 231 N), 362-2800. If a student requires admission to the hospital, the hospitalist will provide his inpatient care. There also is the St. Vincent Ambulatory Care Center 1684 Bush Lane (off St. Rd. 231 S). Monday – Friday 8:00am – 8:00pm, Saturday and Sunday 8:00am – 5:00pm. Neither after hours facilities are a substitute for the Student Health Center.

If you are age 18 or older, the details of the care you receive while at Wabash is protected by federal law. Parents will be informed of your health condition only when authorized by the student or in emergency situations. Parents may also be informed if a student has a health problem where he could present a danger to himself, other students or the college staff.

If you have any questions regarding the Student Health Center, feel free to stop in, call, or email us. Have a safe and enjoyable summer and we look forward to seeing you in the fall.

Sincerely,

Scott K. Douglas, M.D. '84
John R. Roberts, M.D. '83
Carol Lamb, R.N.
