DIVISION III

This Division includes the Departments of Economics, History, Political Science, Psychology, and the Teacher Education Program.

Faculty 2004-2005

Butler, M. (chair)                  Horton, R.
Aden, J.                             Howland, F.
Bankart, B                           McGuire, J.
Bankart, C.P.                        Mikek, P.
Barnes, J.                           Mikesell, P.
Barreto, H.                          Morillo, S.
Blaich, C.++                         Naylor, J.
Bost, P.                             Pittard, M.
Burgess, R.#                         Rhoades, M.
Burnette, J.                         Richardson, S.#
Butler, D.                           Schlewitz, A.
Ford, A.+                            Thompson, C.
Hadley, D.*                          Thuesen, S.
Himsel, S.#                          Warner, R.
                                          Widdows, K.

*Sabbatical leave, full year
+Administrative Appointment
++Leave, Center of Inquiry in the Liberal Arts
#Part-time

Concentration in Division III: for requirements for the major in departments of Division III, see departmental listings.
Division III Courses

252. Statistics for the Social Sciences (Old Number DIV III 01)
   This course provides an introduction to statistics. It covers the design of experiments, descriptive statistics, and statistical inference, including confidence intervals and significance tests for population sums, percentages, and averages. There is also a brief introduction to probability theory. Emphasis is placed on understanding the logic of statistics via spreadsheet simulation. Students also receive considerable exposure to actual sample survey data from the social sciences.
   One-half course credit, fall semester.

402. Contemporary Issues in Social Science (Old Number DIV III 02)
   A colloquium for seniors focusing on contemporary political, social, psychological and economic issues.
   One-half course credit, fall or spring semester.
DEPARTMENT OF ECONOMICS

Faculty: K. Widdows (chair), H. Barreto, J. Burnette, F. Howland, P. Mikek, J. Naylor, S. Richardson

#Part-time

The Department of Economics is dedicated to providing a rigorous, challenging curriculum that emphasizes economic theory and focuses on how economists view the world. Students master a wide variety of philosophical, technical, logical, computer, and quantitative skills. The Wabash College Economics major is taught to evaluate arguments and policies, analyze empirical data, and present his views, rationales, and results.

Senior Comprehensive Exams: The Written Comprehensive Exam in Economics is spread over two days and designed to evaluate the student's understanding of both core concepts and the wide variety of applications of economic theory. The first day is an objective, standardized test that contains questions from every economics course offered at Wabash and a computer-based quantitative component. The second day is an essay exam composed of separate micro and macro sections. The interested student should visit the Department of Economics home page (http://www.wabash.edu/depart/economic/) to see the last several years of written comps essays.

Requirements for the Major: Economics majors must complete at least nine course credits in Economics which must include Economics 291, 292, 251 (1/2 credit), Division III 252 (or its equivalent), Economics 253, and 401. *Please note that Division III 252 does not count toward the nine required economics credits. In addition, the major must include at least two courses with a prerequisite of Economics 291 or Economics 292 (not including Economics 401).

Statistics is required as a prerequisite for Economics 253, but does not count toward the major. Division III 252 or a Mathematics Department Statistics course must be taken before enrolling in Economics 253. In addition, Mathematics 111 or its equivalent is required for the major in economics. Mathematics 111 is best taken in the freshman year.

Recommended Sequence of Courses: The “typical” economics major takes Principles of Economics (ECO 101) in the second semester of his freshman year, the theory/empirical sequence (ECO 251, DV3 252, ECO 253, ECO 291, and ECO 292) during the sophomore year, electives during the junior year, and, finally, Senior Seminar (ECO 401) and electives during the senior year we recommend that the student opt to distribute the workload more evenly by taking Eco 292 in the Fall of his junior year.

Although the above sequence is preferred, there can be flexibility in this basic pattern. The well-prepared first-year student might want to begin the study of economics in the first semester of the freshman year, while “late contractors”
**Economics Department Course Sequences**

**For Economics Majors**

- **Sophomores**
  - Econ 251: Quantitative/Computer Methods
  - Econ 291: Int. Microeconomic Theory
  - Econ 292: Int. Macroeconomic Theory
  - Econ 101: Principles of Economics

- **Juniors/Seniors**
  - Econ 331: Economics of the Public Sector
  - Econ 362: Money and Banking
  - Econ 332: Labor Economics
  - Econ 322: Int'l Finance
  - Econ 333: Ind. Organization and Control
  - Econ 363: Topics in Macroeconomics
  - Econ 321: Int'l Trade
  - Econ 353: Topics in Econometrics
  - Econ 361: Corporate Finance

- **Advanced**
  - Econ 401: Senior Seminar
  - Econ 491: Advanced Microeconomics
  - Econ 492: Advanced Macroeconomics

**For All College**

- (Prerequisite: Econ 101 or consent of instructor)
  - Econ 262: Financial Institutions
  - Econ 213, 214: Economic History
  - Econ 205: History of Economic Thought
  - Econ 224: Economic and Political Development
  - Econ 222: Comparative Economic Systems
  - Econ 231: Law and Economics
(students who decide to major in economics during their sophomore or even junior years) may choose a more tightly packed junior/senior year combination of economics courses.

The prospective economics major should be careful in planning the theory/empirical sequence year. Although the order of ECO 291 and 292 does not matter, the sequence of DV3 252 in the FALL and ECO 253 in the SPRING is crucial. ECO 251 should be taken by the time the other courses in the theory/empirical sequence are completed. It is most convenient to take ECO 251 along with DV3 252 in the fall. Thus, if the economics major is planning to study off-campus as a second semester junior, it is absolutely imperative that he begin the empirical sequence as a sophomore.

Contact any member of the Economics Department if you have questions, need help in making course decisions, or want advice concerning the study of economics at Wabash and beyond.

Requirements for the Minor: Five course credits in economics including Economics 291 or 292.

Course credits for internships do not count towards the major or minor.

Course Descriptions

101. Principles of Economics (Old Number ECO 01)
This introductory course, which covers the basic foundations of microeconomics and macroeconomics, is the gateway to the economics curriculum and an important part of a well-rounded education. The microeconomics portion of the course covers basic supply and demand analysis, market failure, present value, opportunity cost, and the theory of the firm. The macroeconomics portion of the course introduces issues such as inflation, unemployment, and government policy tools. Students attend common lectures once a week and meet in smaller discussion sections twice a week. In addition to discussion and problem solving, the bi-weekly section meetings will focus on the use of Microsoft Excel to analyze real-world economic data.

One course credit, each semester.

205. Development of Economic Thought [Same as HIS 236] (Old Number ECO 11)
Designed for non-majors as well as majors, this course examines the intellectual history of economics. The ideas of great economists (including Smith, Ricardo, Marx, Keynes, Schumpeter and Knight) are analyzed and compared. Particular emphasis is placed on differing views toward capitalism—especially predictions about its eventual fate.

One course credit, fall semester.
213. Topics in Economic History: US [Same as HIS 235] (Old Number ECO 8A)

The purpose of this course is to use economics to improve our understanding of history and to use history to improve our understanding of economics. Examples of questions that may be addressed are: Why is the U.S. wealthy? How do government policies affect the economy? How has the role of government changed over the course of U.S. history? How did the institution of slavery and its abolition affect Southern economic development? Is the current U.S. banking system better than the systems that preceded it? What caused the Great Depression? Prerequisite: Economics 101 or consent of the instructor.

One course credit, fall semester, alternate years.

214. Topics in Economic History: European [Same as HIS 245] (Old Number ECO 8B)

The purpose of this course is to study economic issues in European history. A substantial part of the course is devoted to the Industrial Revolution. What caused the Industrial Revolution and why did it occur in England? What effects did it have on living standards? Other topics will vary, but may include: agriculture, demography, Poor Laws, the Great Depression, and the gold standard. Prerequisite: Economics 101 or consent of the instructor.

One course credit, fall semester, alternate years.

222. Comparative Economic Systems (Old Number ECO 18)

A critical comparative study of various economic systems. This class includes both an introduction to theoretical debates about what system is best, and a survey of some of the economic systems used in the past and in the world today. Particular attention is paid to variations of the capitalist system in Europe and the transition to capitalism in formerly communist countries. Prerequisite: Economics 101 or consent of the instructor.

One course credit, spring semester, alternate years.

224. Economic and Political Development [Same as PSC 324] (Old Number ECO 14)

A brief survey of problems facing lesser-developed countries and of measures proposed and used for the advancement of political integration and the improvement of living standards and social welfare. Study will be made of the role of capital accumulation, private initiative, representative government, and other factors in economic growth and political modernization. Prerequisite: Economics 101 or consent of the instructor.

One course credit, spring semester.
231. Law and Economics (Old Number ECO 24)
An examination of the proposition that economic reasoning can explain the evolution of the law. By focusing on property, tort, and contract law, each student can decide for himself the power of economics as a driving force in the law. By its very nature interdisciplinary, this course is designed for non-majors as well as majors. Prerequisite: Economics 101 or consent of the instructor.

One course credit, spring semester.

251. The Economic Approach with Microsoft Excel® (Old Number ECO 75)
An introduction to optimization, equilibrium, and comparative statics via Microsoft Excel®. This course emphasizes numerical problems while illustrating the essential logic of economics. Economics majors are strongly encouraged to take this course in the sophomore year. Prerequisite: Mathematics III, concurrent registration in Mathematics III, or consent of the instructors.

One-half course credit, both semesters.

253. Introduction to Econometrics (Old Number ECO 31)
This course introduces students to empirical work in economics. Regression for description, inference, and forecasting is presented in a non-formulaic, intuitive way. Microsoft Excel® is used to analyze data and perform Monte Carlo simulation. Heteroscedasticity and autocorrelation are covered. Students will also learn how to read and write empirical papers in economics. Economics majors are strongly encouraged to take this course in the sophomore year. Prerequisite: Division III 252.

One course credit, spring semester.

262. Financial Institutions and Markets (Old Number ECO 02)
This course uses basic tools of economic theory to analyze modern financial institutions and markets. The financial instruments to be covered range from credit card loans to mortgages, stocks, bonds, futures, and options. The main questions of the course are: What roles do commercial banks, pension funds, insurance companies, investment banks, mutual funds, and the government play in financial markets? What determines the prices of stocks and bonds? How can individuals and institutions deal with risk and how is risk measured? What drives innovation in financial markets? The course concentrates on contemporary U.S. institutions, but offers some historical and international perspective. Both non-majors and majors in Economics are encouraged to take this course. Prerequisite: Economics 101.

One course credit, spring semester.

277. Special Topics
The course provides opportunities for specialized, innovative material to be made available for students at the introductory level. Since the content of this
course varies from semester to semester, it may be repeated for credit upon the instructor's approval. **Prerequisite: Economics 101 or consent of the instructor.**

One course credit, fall/spring semester.

**291. Intermediate Microeconomic Theory (Old Number ECO 03)**

The course examines the development of the theories of the price mechanism under competitive and non-competitive market situations. The costs and revenue decisions of the firm are analyzed within the context of standard assumptions about economic behavior. The welfare implications of contemporary problems under partial and general equilibrium conditions are explored. **Prerequisite: Economics 101 and Math 111, or consent of the department chair.**

One course credit, each semester.

**292. Intermediate Macroeconomic Theory (Old Number ECO 04)**

The measurement, determination, and control of the level of economic activity. General equilibrium models are used to determine real output, employment, inflation, unemployment, exchange rates, and interest rates. The roles of fiscal and monetary policy are analyzed in their application to fluctuations in economic activity. **Prerequisite: Economics 101 and Math 111, or consent of the department chair.**

One course credit, each semester.

**321. International Trade (Old Number ECO 10)**

Examines the theory of international trade and its applications. Students will learn why nations exchange, what determines the patterns of production and trade across countries, and what the welfare implications of trade are for the world at large and for the domestic economy. Special topics include GATT, multinationals, protectionism, and Third-world debt. **Prerequisite: Economics 291 and Economics 251, or consent of the instructor.**

One course credit, fall semester. (Not offered 2003-2004)

**322. International Finance (Old Number ECO 77)**

This course provides an introduction to international financial markets. Topics include forward, futures, and options markets, the balance of payments, models of exchange rate determination (including the phenomenon of exchange rate overshooting and speculative bubbles), and the efficacy of central bank intervention on exchange rates. Course materials include case studies of exchange rate policy under the Kennedy and Carter administrations as well as the European Monetary System (EMS). **Prerequisite: Economics 292, and Economics 253.**

One course credit, spring semester.
331. Economics of the Public Sector (Old Number ECO 05)
An examination of the economic role of the public sector in the United States. Some of the general questions addressed include: When do markets fail to bring about desirable outcomes in the absence of government intervention? Under what circumstances can governmental action improve economic outcomes? What are the main features and economic effects of current government tax and expenditure programs? By what principles should reform of these programs be guided? Prerequisite: Economics 291.
One course credit, fall semester.

332. Labor Economics (Old Number ECO 06)
Why do different people earn different wages? What determines firms' demand for labor? What determines workers' labor supply? Why has wage inequality increased? Why does unemployment exist? The purpose of this course is to answer these questions using both microeconomic theory and econometrics, and to apply this knowledge to questions of labor market policy. Topics addressed include the determinants of labor demand and supply, minimum wages, human capital, efficiency wages, and discrimination. Prerequisite: Economics 291 and Economics 253, or consent of the instructor.
One course credit, spring semester.

333. Industrial Organization and Control (Old Number ECO 09)
Extends Economics 291 by examining both the theoretical and the empirical analysis of imperfectly competitive firms. Particular emphasis is devoted to oligopoly theory and strategic behavior in which firms determine the best ways to compete with their marketplace rivals. Other topics include price discrimination, imperfect information, vertical restrictions such as resale price maintenance, and the role of innovation in market structure. Prerequisite: Economics 291 and Economics 251, or consent of the instructor.
One course credit, fall semester.

353. Topics in Econometrics (Old Number ECO 32)
An introduction to applied economic statistics and techniques for reaching sensible conclusions on the basis of empirical economic evidence. The course covers theoretical issues more rigorously than Economics 253, but also gives students hands-on experience with sophisticated econometric software. Topics covered include: simple and multiple linear regressions, autocorrelation and heteroscedasticity, time series and forecasting, simultaneous equations, and qualitative response models. Numerous empirical exercises and a significant empirical paper are among requirements of the course. Prerequisite: Economics 291, 253, 251, or consent of instructor. Mathematics 223 (Linear Algebra) recommended.
One course credit, irregularly scheduled.
361. Corporate Finance (Old Number ECO 23)
This course applies economic theory to analyze financial decisions made by corporations. These decisions include what real assets to invest in and how to raise the funds required for these investments. The analysis concentrates on the roles of the timing of cash flows, the risk of cash flows, and the conflicts of interest between the various actors in the world of corporate finance. Special attention is paid to stocks, bonds, dividends, and options. Extensive use is made of financial data and spreadsheets. Prerequisite: Economics 251, Economics 291, and a course in Statistics (either Division III-252, Math 107, Math 217, Math 227, or Psychology 201).

One course credit, spring semester.

362. Money and Banking (Old Number ECO 16)
An introduction to financial markets and the assets traded therein with an emphasis on the role and function of commercial banks is followed by an examination of the practical problems, successes, and failures of the Federal Reserve System in executing monetary and credit policies in the recent past. Prerequisite: Economics 292.

One course credit, fall semester.

363. Topics in Macroeconomics (Old Number ECO 78)
Featuring macroeconomic policies and issues, this course includes the study of business cycles, the economics of government deficits and debt, case studies in macroeconomic policy, and macroeconomic forecasting. Prerequisite: Economics 292, 253, and 251.

One course credit, fall semester.

364. Case Studies in Macroeconomics (Old Number ECO 78A)
Utilizing a case study approach, this course explores advanced issues in macroeconomic policy. Topics covered include the business cycle, international macro, and growth. Prerequisite: Economics 292, 253, and 251.

One course credit, fall semester.

377. Special Topics
The course provides opportunities for specialized, innovative material to be made available for students at the advanced level. Since the content of this course varies from semester to semester, it may be repeated for credit upon the instructor's approval. Prerequisite: Economics 101, Economics 291 or 292, or consent of the instructor.

One course credit, fall/spring semester.
401. Senior Seminar (Old Number ECO 97)
A capstone seminar course in which current economic problems and policy are analyzed. This course is required of all economics majors. **Prerequisite: Economics 291, 292, 253, and 251.**

One course credit, fall semester.

491. Advanced Microeconomic Theory (Old Number ECO 15)
The course refines the microeconomic analysis offered at the intermediate level by introducing more rigorous mathematical tools. Additional topics in microeconomic theory are introduced and analyzed with the use of advanced mathematical techniques. The course is especially recommended to students considering graduate work in economics and should also prove useful to students considering graduate study in business. **Prerequisite: Economics 291 and two semesters of calculus or consent of the instructor.**

One course credit, irregularly scheduled.

492. Advanced Macroeconomics (Old Number ECO 13)
The major propositions of intermediate macroeconomics are reviewed and expressed in the language of mathematics, and more complex and newer theories of macroeconomics are presented. A major substantive focus will be on the similarities and differences between classical, post Keynesian, monetarist and rational expectations theories for macroeconomics, recent relevant empirical findings and implications of economic policy. The course is especially recommended to students considering graduate work in economics and should also prove useful to students considering graduate study in business. **Prerequisite: Economics 292 and Mathematics 111.**

One course credit, irregularly scheduled.

387, 388. Independent Study (Old Number ECO 87,88)
Students desiring to perform independent study in Economics should plan their project with the instructor who is to supervise. Consent of the department chair is required.

One-half to one course credit, each semester.
DEPARTMENT OF HISTORY

Faculty: S. Morillo (chair), J. Aden, J. Barnes, M. Rhoades, S. Thuesen, R. Warner

History is the study of the past, a process that produces an ever changing view of the past, not a static picture. The History Department therefore strives to make every student his own historian, a task encompassed in the CORE GOALS of the department:

A. CONTENT: to acquire a degree of mastery of both essential factual material and conceptual, thematic and comparative knowledge in several geographical areas, diverse cultures, and different time periods in human history, with particular sensitivity to the change over time of a diverse, global society.

B. THE CRAFT OF HISTORY: to acquire the habit of the many analytical skills which historians use in recovering, researching and writing about the past; such as, constructing important questions, making inferences from primary sources, putting sources into larger contexts, and making one's own interpretations of the past.

C. HISTORICAL THINKING: to develop habits of thinking like an historian: e.g., an appreciation for the complexity of both change and continuity over time and in different ages, cultures and areas of the world; an awareness of historical interpretation and historiographical schools of thought; and an understanding of how events and ideas from the past affect the present.

D. SELF-EXPRESSION: to become competent, confident and fluent in the oral, written and group skills necessary to speak and write about and explore historical questions.

E. SELF-DEVELOPMENT: to become an independent intellectual inquirer into the past, as well as a lifelong learner of history; and to locate oneself and one's family, community and cultural traditions in history.

Comprehensive Examinations: The Written Comprehensive Exam in History is a two day exam that is designed to evaluate the students' mastery of the core goals of the department. The first day generally consists of a take home essay that asks students to discuss some aspect of history, approach to historical studies, or theories of history with respect to those areas of history the student has studied. The second day generally asks students to act as historians using a selected set of primary and secondary source texts provided ahead of time.

Requirements for a Major: Students majoring in history must complete three courses (at least one of which must be at the 300 level) in two of the following areas, and at least one course in the other area:

- World (second digit 0, 6, or 7)
- Europe (second digit 1, 2, or 3)
- Americas (second digit 4 or 5)
Advanced (300 level) courses may include independent studies. In addition, majors must take History 497 and 498, and must maintain a portfolio of selected papers they have written for history courses (details are available in a handout from the Department Chair). Evaluation of portfolios will be an aspect of comprehensive exams in the history major.

History majors, especially those planning to pursue graduate historical studies, are urged to gain a proficiency in at least one foreign language. Proficiency is here defined as the ability to read, without undue difficulty, historical works in the appropriate foreign language.

Requirements for a Minor: A minimum of five courses to be distributed over at least two of the three areas offered by the department.

Course Descriptions—World and Comparative

101. World History to 1500
Exploration of the origins of human civilization and the development of individual civilizations across the world. Emphasis will be on the major old-world areas of civilization and their connections with each other. An effort will be made to develop a conceptual framework for analyzing different civilizations comparatively so as to highlight meaningful similarities and differences among them. This course, along with History 102, 131, 132, 141, 142, 153 and 154, is especially recommended to those students planning to take their first college-level history course.

One course credit, fall semester.

102. World History since 1500
This course traces the increasing interdependence of the world’s different civilizations as improved communications tie more of the world closely together. This will involve explaining the rise to dominance of European civilization in the world community and the reactions this dominance has created across the globe. This course, along with History 101, 131, 132, 141, 142, 153 and 154, is especially recommended to those students planning to take their first college-level history course.

One course credit, spring semester.

200. Topics in World and Comparative History
One-half or one course credit.
201. The World from 1945-present
The focus of this course will be global in perspective, seeking to show how World War II shaped the development of various continents and nations. Topics will include: anti-imperialism and the emergence of Third World nations, the evolution of super-powers, world-wide economic and technological change, and the continuing threat of atomic war.

One course credit.

260. Topics in Asian History
One-half or one course credit.

261. Classical and Imperial China to 1911
A survey of the early history of China from its first dynasties (Shang, Chou) to its last (Ch'ing). This course will examine the complex internal dynamics that came to shape its peoples and institutions. External forces on China's past, before, during, and after sustained contact with the rest of Asia (Buddhism, for instance, and the Mongols) and the West (Marco Polo and the White Lotus and Boxer Rebellions), will be given special attention. Emphasis on social, cultural, economic, and military developments. Extended analysis of primary source documents, web-based materials, and film through the complex and often contradictory perspectives of age, gender, ethnicity, and class will be a major focus. Strong geographic component.

One course credit, fall semester.

262. Modern China from 1911 to the Present
A survey of modern China, in three thematic parts. The first section will examine the end of the Ch'ing Dynasty and the emergence of Nationalism through the end of the Second World War. Part two, the rise of Chinese Communism and the fate of Chairman Mao tse-tung will be explored in depth, through the Great Leap Forward and the Cultural Revolution. The third phase delves into contemporary China through the Tiananmen Square Uprising to the present. Extended analysis of primary source documents, web-based materials, and film through the complex and often contradictory perspectives of age, gender, ethnicity, and class will be a major focus. Strong geographic component.

One course credit, spring semester.

270. Topics in African History
One-half or one course credit.
271. African History to 1885
Precolonial African history, focusing on the sociocultural, economic, and political realities of sub-Saharan societies between the neolithic Period and the Partitioning of the Continent by European powers inaugurated in 1885. Special emphasis will be placed on the tools scholars use to write African history, with particular reference to oral tradition, linguistic and archaeological evidence, and the material cultural record. Important themes include the indigenous, trans-Saharan, and trans-Atlantic slave trades, gender, the role of women in African history, Islam, art, and music. Course will culminate in regional vistas of Africa on the event of imperialist expansion of European powers. Expanding general geographic knowledge will be highly encouraged.
One course credit, fall semester.

272. African History from 1885
The period from the European Partition of Africa in 1885 to Postindependence was one of the most significant and drastic eras of change for Africans. Their relationship with the Western world fundamentally altered African lifeways, drawing them into a global wage labor economy, and seeing them interact in new ways with migration, the World at War, and the Colonial Endeavor. This course will explore these changes through the use of video, primary and secondary source materials, CD-ROMs, art and material culture, and music. Expanding general geographic knowledge will be highly encouraged.
One course credit, spring semester.

300. Advanced Topics, World and Comparative History (Old Number HIS 07)
This course provides opportunities for small group and independent work in intensive study of selected topics in world and comparative history. Since the content of this course varies from semester to semester, it may be repeated for credit upon the instructor's approval. Prerequisite: Previous course work in world history or consent of the instructor.
One-half or one course credit, either semester.

301. Craft and Theory of World History
This is an upper level course in world history. Students will read secondary literature about world history and will read world history textbooks more for historiographical analysis than for content. Emphasis will therefore be on the theories and practices of world history; students will be expected to produce a significant term paper focusing either on a curricular proposal for a world history course or on an historiographical analysis of current trends and developments in the field. Prerequisite: previous work in world history or consent of instructor.
One course credit, alternate spring semesters
370. Advanced Topics in African History
This course provides opportunities for small group and independent work in intensive study of selected topics in world and comparative history. Since the content of this course varies from semester to semester, it may be repeated for credit upon the instructor's approval. **Prerequisite: Previous course work or consent of the instructor.**
One-half or one course credit, either semester.

Course Descriptions—Europe

131. 19th Century Europe
This survey will cover events in European history from the French Revolution to the end of the 19th century. It will explore nationalism, utopianism, Europe's quest for colonial expansion, and the rise of the Industrial Revolution. In addition to these vast issues, the course also examines developments in social history including family life, change in urban areas, health, medicine, and gender. This course, along with History 101, 102, 132, 141, 142, 153 and 154, is especially recommended to those students planning to take their first college-level history course.
One course credit, fall semester.

132. 20th Century Europe
This survey will examine significant events in European history from 1900 to the end of the twentieth century. The course will cover circumstances leading to World War I, the rise of fascism, and World War II. The survey ends with a discussion of the Cold War, its ultimate demise, and nuclear legacy. Since there was more to the twentieth century than military history, the class will also consider how European societies reacted to war and will focus on life on the home front, gender relations, cultural change, and consumerism. This course, along with History 101, 102, 131, 141, 142, 153 and 154, is especially recommended to those students planning to take their first college-level history course.
One course credit, spring semester.

210. Topics in Ancient History
One-half or one course credit.

211. Ancient History; Greece [Same as CLA 105]
A survey of Greek history from the end of the Bronze Age (ca. 1100 B.C.) to the time of the Roman conquest of the Greek world (first century B.C.). Emphasis is on the origin, evolution, and problems of the most important Greek political-social-cultural structure, the polis or “city-state.”
One course credit, fall semester, 2004-2005 and alternate years.
212. Ancient History; Rome [Same as CLA 106]
A survey of Roman history from the Etruscan period (6th and 5th centuries B.C.) to the transformation of the Roman world to the Medieval (4th and 5th centuries A.D.). Emphasis is on the origins, nature, effects, and evolution of imperialism in Roman politics, culture, and society.
One course credit, spring semester, 2004-2005 and alternate years.

220. Topics in Medieval and Early Modern Europe
One-half or one course credit.

221. Medieval Europe, 400-1400
The history of Europe from ca. 400 to ca. 1400, focusing on Latin Christendom. The course traces the creation of the medieval synthesis out of elements of late Roman and Germanic societies and the dissolution of that synthesis in the troubles of the 14th century. Emphasis is on examining economic, institutional, and social structures and the historical context of medieval cultural production through examination of primary sources.
One course credit, fall semester, 2005 and alternate years.

222. Early Modern Europe, 1400-1800
Europe from the breakup of the medieval world to the dawn of the modern age. The course traces the transformations of all aspects of European life—economic organization, state structures, religious institutions and sentiments, and intellectual outlooks—with an emphasis on different historiographical approaches and analysis of secondary sources, especially monographs.
One course credit, fall semester, 2004 and alternate years.

230. Topics in Modern Europe
One-half or one course credit.

235. Topics in Economic History: European. [Same as Econ 214]

236. History of Economic Thought. [Same as Econ 205]

310. Advanced Topics, Ancient History
This course provides opportunities for small group and independent work in intensive study of selected topics in Ancient history. Since the content of this course varies from semester to semester, it may be repeated for credit upon the instructor's approval. Prerequisite: Previous course work in ancient history or consent of the instructor.
One-half or one course credit, either semester.
320. Advanced Topics, Medieval and Early Modern Europe
This course provides opportunities for small group and independent work in intensive study of selected topics in medieval and early modern European history. Since the content of this course varies from semester to semester, it may be repeated for credit upon the instructor's approval. Prerequisite: Previous course work in medieval or early modern Europe or consent of the instructor.
One-half or one course credit, either semester.

330. Advanced Topics, Modern Europe
This course provides opportunities for small group and independent work in intensive study of selected topics in modern European history. Since the content of this course varies from semester to semester, it may be repeated for credit upon the instructor's approval. Prerequisite: Previous course work in modern Europe or consent of the instructor.
One-half or one course credit, either semester.

334. Russia, 1860-present
The reforms of Alexander II; the rise of Russian revolutionary movements; the revolutions of 1905 and 1917; abdication of the Czar; victory of the Bolsheviks; the “dictatorship of the proletariat”; organization of the Soviet Union; and the era of Stalin and events since his death are some of the major topics considered. Recommended for upperclassmen or with the consent of the instructor.
One course credit.

Course Descriptions—Americas

141. America to 1877
An introduction to American history and to the departmental Core Goals in the process of historical investigation and understanding. Students will learn the basic facts and conceptual themes involved in Native Indian cultures, Puritanism, the American Revolution, the New Nation, expansionism, slavery, reform, Civil War and Reconstruction. The course focuses on significant landmark political events, but also on the everyday experiences and social history of women, minorities, and other underrepresented groups. This course, along with History 101, 102, 131, 132, 142, 153 and 154, is especially recommended to those students planning to take their first college-level history course.
One course credit, fall semester.
142. America since 1877
The emphasis is upon some of the major issues in American politics and society since 1877: the growth of big business; changes in the lives of farmers, workers, and immigrants; the rise of the city; reform movements among rural and urban labor and among minority groups. In addition to studying national history and the emergence of America as a world power, students will have an opportunity to investigate their own family histories. This course, along with History 101, 102, 131, 132, 141, 153 and 154, is especially recommended to those students planning to take their first college-level history course.
One course credit, spring semester.

153. Pre-Columbian and Conquest America
This course will examine the peoples and cultures of the Americas before European contact, and the subsequent process of conquest by Spanish and Portuguese invaders. A major focus of the course will be the development of student study and research skills for use in history and other courses. This course, along with History 101, 102, 131, 132, 141, 142, and 154 is especially recommended to those students planning to take their first college-level history course.
One half course credit, first half fall semester

154. Colonial Latin America
A survey of the history of Latin America focusing on the synthetic and syncretic development of a new civilization with roots in the Americas, Europe, and, Africa. Emphasis on the interplay of colonial administration with local (American) interests, and the varieties of racial, class, and gender differences shaping that interplay and the genesis of new cultures. This course, along with History 101, 102, 131, 132, 141, 142, and 153 is especially recommended to those students planning to take their first college-level history course.
One half course credit, second half fall semester

240. Topics in American History
One-half or one course credit.

244. African-American History
Emphasis on three crucial periods: slavery, Reconstruction and its aftermath, and the civil rights and Black liberation movements of the 1960s. Relations between Blacks and Whites will be examined through the reading and discussion of classic African-American texts by Douglass, Jacobs, Washington, DuBois, Wright, Angelou, Moody, Walker, Malcolm X, King, Baldwin, Gates, and others.
One course credit, fall semester.
245. Topics in Economic History: [Same as Econ 213]

250. Topics in Latin American History
   One-half or one course credit.

252. Peoples and Nations of Latin America
   A survey of the history of Latin America from the Wars of Independence through the national period to the current day. This course will examine the various internal dynamics and external influences that have shaped the experiences of the countries of Latin America since independence. Emphasis on socio economic structures as the conditioning environment for political and cultural developments. A major focus will be historical analysis of scholarly monographs and primary source documents.
   One course credit, spring semester

340. Advanced Topics, American History
   This course provides opportunities for small group and independent work in intensive study of selected topics in American history. Since the content of this course varies from semester to semester, it may be repeated for credit upon the instructor's approval. Prerequisite: Previous course work in American history or consent of the instructor.
   One-half or one course credit either semester.

350. Advanced Topics, Latin America
   This course provides opportunities for small group and independent work in intensive study of selected topics in Latin American history. Since the content of this course varies from semester to semester, it may be repeated for credit upon the instructor's approval. Prerequisite: Previous course work in Latin America or consent of the instructor.
   One-half or one course credit, either semester.

Course Descriptions—Departmental

187, 188, 287, 288, 387, 388. Independent Study
   Open to history majors with permission of the instructor and the department chair. Level of the course (100, 200 or 300) determined by the instructor.
   One-half or one course credit each semester.
497. Philosophy and Craft of History  
This course is required of all majors in history and should be taken in the fall semester of the junior year. Students have an opportunity to read different examples of historical writing and to examine the philosophical and methodological assumptions which underlie the historian's craft.  
One course credit, fall and spring semesters.

498. Research Seminar  
All history majors must take this course in the fall semester of their senior year, while other juniors or seniors are welcome to enroll, with the consent of the instructor. Topics will vary from year to year, with an emphasis on research techniques, small group discussions, conferences with the instructor, and independent development of individual projects. In recent years there has been a tendency to undertake investigations into aspects of local history, culminating in a final seminar paper.  
One course credit, fall semester.
DEPARTMENT OF POLITICAL SCIENCE

Faculty: P. Mikesell (acting chair), M. Butler, D. Hadley*, S. Himsel#, J. McGuire, A. Schlewitz

*Sabbatical leave, full year
#Part-time

Aristotle called politics “the queen of the sciences.” Knowledge of politics is important for all liberally educated people. At Wabash, the department offers courses accessible to all students in four areas: American politics, comparative politics, international politics and political theory. We offer opportunities for non-majors to seek answers to perennial questions of politics and to learn more about how government works in their own country and around the world. Our major program combines a solid overview of the discipline with opportunities for in depth study. Students majoring in political science take a survey course in each area and then concentrate on one area for advanced study.

By studying political science, students learn to analyze and interpret the significance of political events and governmental processes in order to understand, evaluate and even shape them. As a department we hope to turn interested students, whatever their career plans or other interests, into politically literate college graduates who are able to comprehend their political world in ways appropriate to their individual inclinations, as intelligent and responsible citizens, journalists, attorneys, active participants in business, community or electoral politics, as candidates for office, public officials, or academic political scientists.

Requirements for the Major: Majors in Political Science are required to take 9 courses (and may take as many as 11) distributed as follows:

Four introductory courses:

- PSC 111—Survey of American Politics (a fall semester course)
- PSC 122—Survey of Comparative Politics (a spring semester course)
- PSC 231—Survey of Political Theory (a fall semester course)
- PSC 242—Survey of International Politics (a spring semester course)

*These courses should be taken in the first two years. They may be taken in any order, but the department strongly suggests that, when possible, students take them in the order listed above.*

Two advanced courses in one area of specialization chosen from the four areas above. Students will be examined over this area on the first day of senior comprehensive examinations.
PSC 497—Senior Seminar in Political Science (a fall semester course). Students will write seminar papers for this course in the area in which they have elected to specialize (see above).

At least two additional Political Science courses.

**Note:** Students may count either Philosophy 213 (Philosophy of Law) or a departmentally approved offering listed under Philosophy 219 (Topic in Ethics and Social Philosophy) toward the major or minor in Political Science. No more than one course credit in Philosophy may be counted toward the Political Science major or minor.

The **Senior Comprehensive Examination** consists of 6 hours of written examinations administered over two days. The first day's exam questions will be available in advance and will require a student to analyze and synthesize material in his area of specialization within political science. The second day's examination requires the student to write shorter essays in two other areas of the discipline. In addition, the second day's examination may ask for some short answers in the area of specialization as well as an analysis of political data. The student must also pass the College's oral examination.

**Collateral requirements:** Political Science majors are also required to take Economics 101, History 102, and either History 141 or 142. Since these courses provide important background material that will enhance the student's understanding of political science as a major field, he is strongly encouraged to complete them during his first two years of study. Students are strongly encouraged to take statistics or PSC 261.

Requirements for the Minor: Minors in Political Science are required to take two of the four survey courses listed above, two advanced courses in one of those two areas, and either an advanced course in the second area in which a survey course was taken or PSC 261.

**Course Descriptions**

The four courses labeled “Survey” assume no prior knowledge of the subject matter. Those marked “advanced” build on the specific introductory course cited as a prerequisite.

111. **Survey of American Government and Politics (Old Number PSC 02)**

An analysis of the powers, functions, and political bases of government in America, including attention to democratic theory, civil liberties, political parties and pressure groups, campaigns and elections, Congress and the Presidency, judicial review, federal-state-local relations, and public policy making in domestic, foreign and budgetary areas.

One course credit, fall semester.
122. Survey of Comparative Politics (Old Number PSC 05)
Comparative Politics is a sprawling field of inquiry in which scholars investigate issues ranging from the origins of revolution to the family planning policies of various governments, from democratization to land seizures by peasant communities in different countries. What holds this field together is the notion that we can best understand and explain the political phenomena of different nations (including our own) by comparing them in careful, precise ways. In this course, we will examine some of the questions Comparativists ask, and the ways they go about answering them. We will also familiarize ourselves with the politics and polities of ten nations (including the U.S.), and mull over arguments concerning their differences and similarities. In this course you should become more knowledgeable of other countries, and also see how comparisons enable us to better understand our own nation’s political development. No prerequisite.
One course credit.

231. Survey of Political Theory (Old Number PSC 01)
The survey of political theory will use selected political theorists to examine a series of major questions which are central to political theory, e.g., power, authority, justice, and liberty.
One course credit, fall semester.

242. Survey of International Politics (Old Number PSC 09)
A study of major contemporary approaches to understanding international politics, including political realism, pluralism, globalism, and feminism. Through this framework, the course will take up concepts such as the evaluation of national power and the balance of power, the interplay of individuals and groups in international politics, the impact of capitalism on the development of the world-system, and the role of gender in world politics.
One course credit, spring semester.

261. Scope and Methods of Political Science (Old Number PSC 31)
What do political scientists know and how do they know it? This course focuses on the nature of political science as a discipline, the range and kinds of questions it addresses, and the methods and techniques by which it seeks answers to those questions. We will use examples from U.S., comparative, and international politics to examine the scope of the political science discipline and the different approaches we take to answering important questions about how and why political systems work as they do. We will also survey some of the basic statistical techniques employed in systematic studies of politics and government. This course is strongly recommended for sophomores planning to major in political science.
One course credit, spring semester.
278. Special Topics

**Latin American Migration to Crawfordsville, Indiana**

In this course we investigate national and local migration trends, with a focus on Mexican migration to our town, Crawfordsville, Indiana. We will contribute to an ongoing research project in which we will compile hard data, interviews, and observations on the following 1) national and local trends in Latin American migration to the U.S.; 2) push and pull factors encouraging migration; 3) local political issues arising from this migration; and 4) U.S. immigration policies and their consequences for Latin American migrants. *No prerequisites.* One-half course credit.

**Race and Ethnicity in US Politics, Past and Present**

This course will begin by studying the past incorporation of diverse populations into the US via conquest, slavery, colonization, and immigration. It will move on to explore the ways in which these types of incorporation shaped racial and ethnic identities and political participation. We will focus on the Europeans arriving around the turn of the century, African Americans during the Civil Rights era, and current Hispanics. In the latter half of this course, we will take what we have learned and apply it to research of race, ethnicity and politics in Crawfordsville, employing primary sources to examine the ways by which different ethnic groups have shaped, or been shaped by, local political institutions and practices. The ultimate goal is to be able to compare past patterns of incorporation in Crawfordsville with that of Hispanics in the present. *No prerequisites.*

One-half course credit.

311. Congress and the Executive (Old Number PSC 11)

A study of the legislative and executive branches of the United States government. This course will involve analysis of each branch as an institution. Particular attention will be given to the interactions between and the interdependence of Congress and the Executive and the effects of these interactions on the decisions and operations of the two branches of government. Counts as an advanced course in American Politics. *Prerequisite: Political Science 111 or consent of the instructor.*

One course credit, fall semester. Beginning Academic Year 2005-2006 this course will be offered in the spring semester.

312. Parties, Elections and Pressure Groups (Old Number PSC 12)

A systematic look at mechanisms for popular control of American government. This course looks at the nature of public opinion and its translation into political action. Political parties and interest groups are investigated as mechanisms which link the citizen to the policy-making system. Attention will be given
to elections and the bases upon which individuals make their decisions at
the polls. We will also consider the conflicting arguments about the decline,
decomposition, and realignment of parties in the 1980s and the rise of the
single-issue interest group. Counts as an advanced course in American Politics.
Prerequisite: Political Science 111 or consent of the instructor.

One course credit, spring semester. Beginning Academic Year 2005-2006 this
course will be offered in the fall semester.

313. Constitutional Law (Old Number PSC 07)
The Supreme Court has accurately been described as a “Storm Center” of
political controversy. This course examines the Court’s most potent power—to
strike down as unconstitutional the actions of elected officials. We will focus on
key Supreme Court decisions, including those dealing with affirmative action,
gay rights, abortion, tax money for religious schools, and deciding the 2000
Presidential Election. What role should judges play in deciding such divisive
issues? How should the Court apply such broadly worded constitutional guar-
antees as “equal protection” and “due process of law”? And what impact have
the Court’s decisions had—on other branches of government and on American
society in general? Counts as an advanced course in American Politics. Prereq-
usite: Political Science 111 or consent of the instructor.

One course credit, fall semester.

317. State and Local Politics (Old Number PSC 17)
A survey of the institutions, actors, and processes involved in the governing
of states, cities, and other local jurisdictions. Attention is given to intergov-
ernmental relations as well as to the analysis of individual units. Field work
is required. Counts as an advanced course in American Politics. Prerequisite:
Political Science 111 or consent of the instructor.

One course credit, spring semester.

324. Economic and Political Development [Same as ECO 224] (Old Number
PSC 04)
A brief survey of problems facing lesser-developed countries and of mea-
sures proposed and used for the advancement of political integration and
the improvement of living standards and social welfare. The roles of capital
accumulation, private initiative, representative government, and other factors
in economic growth and political modernization will be studied. Counts as an
advanced course in International Politics or Comparative Politics. Prerequisite:
Political Science 122 or consent of the instructor.

One course credit, spring semester.
325. Latin American Politics (Old Number PSC 25)
The central purpose of this course is to introduce students to the varied political institutions and practices throughout Latin America. Another purpose is to sharpen our analytical tools so that we can better describe and explain the political differences and similarities among Latin American countries. Finally, this course will increase our understanding of the obstacles Latin Americans have faced in building stable, equitable political systems, and our appreciation of their many accomplishments. Each year brings a new thematic focus. This year we will focus on militarism and demilitarization. Counts as an advanced course in Comparative Politics. Prerequisite: Political Science 122 or consent of the instructor.

One course credit, fall semester.

326. Politics of the Middle East (Old Number PSC 16)
A survey of the politics of the major nations of the region plus attention to several of the leading issues, including the Israeli-Arab conflict, oil and the Persian Gulf, and the broader question of economic and social development. Counts as an advanced course in Comparative Politics. Prerequisite: Political Science 122 or consent of the instructor.

One course credit, spring semester.

328. Comparative Non-Democratic Politics (Old Number PSC 18)
An examination of some of the important cases of non-democratic politics with special attention to their historical and ideological bases as well as their structural and operational features. Counts as an advanced course in Comparative Politics.

One course credit, fall semester.

330. History of Political Thought: Plato to Machiavelli (Old Number PSC 13)
A series of half-courses, each of which will focus on a particular political theorist from classical antiquity, the medieval period, or the Renaissance. Specific offerings will vary from year to year. Counts as advanced course work in political theory. Prerequisite: Political Science 231 or consent of the instructor.

One-half course credit, fall semester, first half.

335. History of Political Thought: Hobbes to the 20th Century (Old Number PSC 14)
A series of half-courses, each of which will focus on a particular political theorist from the modern period. Specific offerings will vary from year to year. Counts as advanced course work in political theory. Fall 2004 the focus of the course will be, “Age of Democratic Revolutions.” Prerequisite: Political Science 231 or consent of the instructor.

One-half course credit, spring semester, first half.
346. American Foreign Policy (Old Number PSC 26)
An introduction to the diplomatic-military facets of past, present, and alternative foreign policy strategies. An analysis of the political, ideological, institutional, technological, and strategic factors shaping the United States' foreign policy. Counts as an advanced course in International Politics or American Politics. Prerequisite: Political Science 242 or 111 or consent of the instructor.

One course credit, fall semester.

350. History of Political Thought: Contemporary Political Thought (Old Number PSC 15)
A series of half-courses, each of which will focus on a particular political theorist from the contemporary period. Specific offerings will vary from year to year. Counts as advanced course work in political theory. Prerequisite: Political Science 231 or consent of the instructor.

One-half course credit, fall semester, second half.

353. History and Philosophy of Law (Old Number PSC 03)
An examination of the concepts of law considered historically or thematically. Attention will be given primarily to the common law experience in the Western world with consideration of such concepts as freedom and the law, sources of law, nature of law, property and contract. Not recommended for freshmen and sophomores. Counts as an advanced course in Political Theory. Prerequisite: Political Science 231 or consent of the instructor.

One course credit. Not offered 2004-05.

356. Constitutionalism (Old Number PSC 06)
This semester of constitutional law will focus on the nature of constitutionalism, using materials and problems relating to this concept. Counts as an advanced course in Political Theory. Prerequisite: Political Science 231 or consent of the instructor.

One course credit. Not offered 2004-05.

371, 372, 373, 374. Special Topics (Old Numbers PSC 77, 78)
These courses will focus on a particular issue, concept, problem or question at an advanced level with specific prerequisites.

371. Special Topics: American Politics
372. Special Topics: Comparative Politics
373. Special Topics: Political Theory
374. Special Topics: International Politics

Politics of the European Community (Old Number 78A)
A study of the basic organization of the Community. The course will include an historical dimension, focusing on the development of efforts to move toward closer union. The main emphasis of the course will be on political institutions and issues and integration as a political process. Counts as an advanced course in international politics. Prerequisite: Political Science 122 or 242 or consent of the instructor.
One course credit, spring semester 2005.

287, 288, 387, 388, 487, 488 Independent Study (Old Number 87, 88)
Independent Study is available to students with the permission of the instructor who will supervise the study as well as from the department chair prior to enrollment.
One-half or one course credit each semester.

497. Senior Seminar (Old Number PSC 97)
Open only to senior political science majors. This is both a reading and a research seminar, organized around a general concept central to the discipline. Participants discuss common readings on the topic. They also prepare individual research papers which treat the general theme, but from the stance of their chosen emphases within the major.
One course credit, fall semester.
DEPARTMENT OF PSYCHOLOGY

Faculty: B. Bankart (chair), C.P. Bankart, C. Blaich++, P. Bost, R. Horton, C. Thompson

+++Leave, Center of Inquiry in the Liberal Arts

Psychology is defined as “the science of behavior and mental processes, and the application of research findings to the solution of problems.” This definition encompasses an enormous number of specialty areas, and psychologists are the most diverse group of people in our society to share the same title. The core goals of the Psychology Department are:

• CONTENT: to acquire a degree of mastery of both factual and conceptual knowledge in several areas of psychology.

• THINKING SKILLS: To become habitually inquisitive, trustful of reason, and honest in facing personal biases; to actively evaluate knowledge and ideas.

• SELF-EXPRESSION: to become competent and confident in the oral and written skills needed to speak and write with facility and sophistication about psychological issues and research.

• THE METHODOLOGY OF PSYCHOLOGY: to acquire the ability to use the scientific method to generate and answer significant questions in an ethical manner, to demonstrate quantitative literacy, and to become increasingly independent in posing questions and pursuing answers through several research strategies.

• PSYCHOLOGY AND SOCIETY: to understand the nature of the complex relationship between psychological inquiry and social policy; to think critically about how the results of psychological research are used and how they might be used in the future.

• HISTORICAL PERSPECTIVE: To understand and be able to evaluate critically the diversity of viewpoints about human nature and behavior represented over the course of psychology's history.
Requirements for the Major and Minor: In the spring of 2004 we established new requirements for the major and minor. Although we recommend that all majors and minors immediately follow the new requirements whenever possible, students graduating in 2006 or earlier may choose whether to follow the old or the new requirements. Beginning with the Class of 2007, all majors and minors must follow the new requirements.

Requirements for the Major (Old—acceptable only through the class entering Fall of 2003):

- **Group I—Introductory**: General Psychology (Psychology 101)

- **Group II—Research**: Research Methods & Statistics I and II (Psychology 201 and 202). Students are encouraged to begin this sequence in their sophomore year especially if they are interested in graduate school or wish to study off-campus.

- **Group III—Core Content**: One 220's course and one 230's course. One additional course from either the 220s or 230s group. (Special topics 210 courses count either toward the 220s or 230s core; see the individual course description to find out which one.)

- **Group IV—Advanced**: Two courses, to include Senior Seminar (Psychology 497) and one additional full credit (or two half credits) from courses numbered 300's.

- **Additional courses** to bring total Psychology course-credits to a minimum of 9. Note: Students planning to apply to graduate school are strongly urged to take the maximum of 11 courses including a full credit of Independent Study (Psychology 387, 388).

- **Biology Course**: Psychology majors are required to take either Biology 111 or 101, preferably by the end of the sophomore year.

- **Written Senior Comprehensive Examinations** in Psychology require majors to (1) organize and synthesize information to support their thoughts on questions of broad interest to psychologists, (2) to demonstrate knowledge across major content areas of psychology, and (3) to demonstrate competence with the scientific method and statistics.

- **Faculty Advisors**: Majors are strongly urged to select an advisor from the psychology department when they declare their major.
Requirements for the Major (New—obligatory beginning with the class entering in the Fall of 2004):

- **Introductory:** General Psychology (Psychology 101)

- **Research:** Research Methods & Statistics I and II (Psychology 201 and 202). Students are encouraged to begin this sequence in their sophomore year, especially if they are interested in graduate school or wish to study off-campus.

- **Intermediate-Advanced Course Sequences:** Any two of the following five 2-course sequences:
  1. Psychology 220 or 221: Child or Adult Development—Psychology 320: Advanced Development
  5. Psychology 233: Physiological Psychology—Psychology 333: Advanced Physiological Psychology

- **Experimental-Physiological:** At least one of the following four intermediate courses:
  1. Psychology 231: Learning and Cognition
  2. Psychology 232: Sensation and Perception
  3. Psychology 233: Physiological Psychology
  4. Psychology 235: Cognitive Neuropsychology

  **Note:** If either the Psychology 231—Psychology 331 or the Psychology 233—Psychology 333 intermediate-advanced course sequence is taken (see above), the Experimental-Physiological requirement is met.

- **Senior Seminar:** Psychology 497

- **Additional courses** to bring total Psychology course-credits to a minimum of 9. Note: Students planning to apply to graduate school are strongly urged to take the maximum of 11 courses including a full credit of Independent Study (Psychology 387, 388).

- **Biology Course:** Psychology majors are required to take either Biology 111 or 101, preferably by the end of the sophomore year.

- **Written Senior Comprehensive Examinations** in Psychology require majors to (1) organize and synthesize information to support their
thoughts on questions of broad interest to psychologists, (2) to  
demonstrate knowledge across major content areas of Psychology, and (3)  
to demonstrate competence with the scientific method and statistics.

- **Faculty Advisors**: Majors are strongly urged to select an advisor from the  
  Psychology Department when they declare their major.

**Requirements for the Minor (Old—acceptable only through the class entering Fall 2003):**

- **Group I—Introductory**: General Psychology (Psychology 101)

- **Group II—Research & Methods**: Either Mathematics 107 (Statistics:  
  Concepts and Controversies), or Mathematics 217 (Introduction to Statistics).  
  Neither course counts towards the five Psychology courses needed  
  for the minor. Psychology 201 may be substituted for Mathematics 107 or  
  217, if desired, but it does not count toward the five Psychology courses  
  needed for the minor.

- **Group III—Core Content**: One 220s course and one 230s course. (Special  
  topics 210 courses count either toward the 220s or 230s core; see the  
  individual course description to find out which one.)

- **Additional courses** to bring total Psychology course-credits (other than  
  Psychology 201) to a minimum of 5.

**Requirements for the Minor (New—obligatory beginning with the class entering Fall 2004):**

- **Introductory**: General Psychology: Psychology 101

- **Research & Methods**: Research Methods and Statistics I: Psychology  
  201.

- **At least one of following six courses:**
  1. Child Development: Psychology 220
  2. Adult Development: Psychology 221
  3. Social Psychology: Psychology 222
  4. Abnormal Psychology: Psychology 223
  5. Learning and Cognition: Psychology 231
  6. Physiological Psychology: Psychology 233

- **Additional courses** to bring total Psychology course-credits to a  
  minimum of 5.
Off-Campus Study: Psychology majors and minors considering taking courses at other campuses, or abroad, should be aware that it is difficult to meet our Psychology 201 and 202 requirements at other schools. Because both courses combine research methods and statistics, an off campus statistics course does not substitute for either requirement. This means you should plan to take Psychology 201 and 202 for Majors at Wabash. Permission to spend the junior year abroad requires completion of Psychology 201 and 202 prior to going off campus.

Course Descriptions—100's Introductory Level

101. General Psychology (Old Number PSY 01)
A survey of concepts, principles, and theories of an empirical science of behavior. Topics include behavioral biology, learning, memory, sensation, perception, cognition, motivation, emotion, social behavior, personality, and psychopathology. No prerequisite. Note: There is a special section of Psychology 101 for freshmen only that actively engages students in psychological methods of inquiry.

One course credit, each semester.

102. Human Sexual Behavior (Old Number PSY 11)
An overview of human sexual anatomy, development, function, and diversity. Emphasis is on the psychological aspects of sexuality including the study of attitudes towards sexuality, sexual preference, love and marriage, contraception, and commercial sex. Particular attention is paid to the development and enactment of sex roles, the construction of gender, and sex differences. No prerequisite.

One course credit, fall semester.

Course Descriptions—200's Intermediate Level

201. Research Methods and Statistics I (Old Number PSY 02)
An introduction to the principles and techniques involved in the design and analysis of psychological research. Development of abilities in quantitative analysis and reasoning, decision-making, and hypothesis testing are aided by laboratory sessions where students conduct behavioral research projects. Prerequisite: Psychology 101 (may be taken concurrently).

One course credit, both semesters.
202. Research Methods and Statistics II (Old Number PSY 03)
A continuation of Research Methods and Statistics I, with a focus on more advanced research designs and statistical procedures. Classes are supplemented by laboratory sessions where students conduct behavioral research projects which they present at a regional research conference. **Prerequisite**: Psychology 201. **Note**: Psychology 202 assumes mastery of the content from Psychology 201; we strongly recommend that students take Psychology 202 only if they received a grade of “C” or better in Psychology 201.

One course credit, spring semester.

210. Special Topics: Various topics at the intermediate level may be offered from time to time.

**Special Topics: Sex, Gender and Masculinity**
Biology, psychology, and culture combine to create and define male and female human beings. Psychology 210 explores this intersection and surveys current theory, research and data on the construction of men’s and women’s lives, with a special focus on the construction of masculinity sexual identity. Students will complete research projects on a question of their own formulation. This course counts in the 220s course category. **Prerequisite**: Psychology 101 or 102.

One course credit. Spring semester.

211. Cross-Cultural Psychology. (Old Psych 210: Special Topics: Cross-Cultural Psychology)
This course explores the ethnic and cultural sources of psychological diversity and unity through cross-cultural investigation. Topics include human development, perceptual & cognitive processes, intelligence, motives, beliefs & values, and gender relations. **Prerequisite**: Psychology 101.

One course credit, fall semester.

220. Child Development (Old Number PSY 20)
Through lecture and discussion, students will examine classic and current theory and research on the physical, cognitive, and psychosocial development of children from the prenatal period through adolescence. Through weekly naturalistic laboratory assignments in the community, students will learn and practice several observational methods and will design and conduct their own mini-study. **Prerequisite**: Psychology 201 (may be taken concurrently).

One course credit, fall semester.
221. Adult Development (Old Number PSY 21)
A study of developmental changes during adulthood. Continuities and changes across age will be examined in terms of biology, intellectual ability, personality, and social interaction. The assumption that aging means unidirectional decline in growth and development is challenged. Involvement in some practical experience will bring students into direct contact with adults at various stages of development. Prerequisite: Psychology 101.

One course credit, spring semester.

222. Social Psychology (Old Number PSY 22)
A survey of research findings and methodologies of social psychology. Topic coverage deals with social perception, attitude formation, attitude change, and the psychology of group processes and interactions. Students are encouraged to develop their own research ideas. Prerequisite: Psychology 201 (may be taken concurrently), or permission of the instructor.

One course credit, fall semester

223. Abnormal Psychology (Old Number PSY 23)
An examination of the major disorders of human behavior, including their forms, origins, and determinants. Treatment strategies and issues are explored in depth. Emphasis on empirical studies and current research developments in psychopathology. Prerequisite: Psychology 101.

One course credit, spring semester.

231. Learning and Cognition (Old Number PSY 31)
An overview of the major information processing feats of the human mind, such as problem solving, reasoning, memory, language, visual perception, and the development of expertise. Students will explore the scientific techniques used to understand these invisible mental processes, and our current knowledge of how these processes are implemented in the brain. Prerequisite: Psychology 101.

One course credit, fall semester.

232. Sensation and Perception (Old Number PSY 32)
Anatomy and function of the sensory system. The interrelationships between physical stimuli, physiological events, and psychological perception are addressed. Prerequisite: Psychology 101, plus either Biology 101 or 111 (may be taken concurrently).

One course credit, fall semester.
DIVISION III, THE SOCIAL SCIENCES/DEPARTMENT OF PSYCHOLOGY

233. Physiological Psychology (Old Number PSY 33)
An introduction to the biological bases of behavior. Examination of nervous system structure and function is followed by an examination of the neurophysiological foundations of motor ability, sexual behavior, ingestive behavior, sleep and arousal, learning and memory, reinforcement, and language. Prerequisite: Psychology 101, plus either Biology 101 or 111 (may be taken concurrently).

One course credit, spring semester.

235. Cognitive Neuropsychology (Old Number PSY 335, Cognitive Neurophysiology; PSY 86)
This course examines deficits in human cognitive function resulting from brain damage. It draws on principles of neuroscience, psychology, and neurology for insights into how the brain mediates the ability to use and integrate capacities such as perception, language, actions, memory, and thought. Prerequisite: Psychology 101, and Psychology 231 or 233, or permission of the instructor.

287, 288. Intermediate Research (Old Number PSY 47, 48)
Individual students will work with a faculty member to design and carry out intermediate level empirical or library research on a topic of their choice. A brief proposal outlining the work to be conducted, and an anticipated timetable for completion, must be approved by the faculty supervisor no later than two weeks following the first day of classes. If the faculty supervisor believes the project will require longer than one semester to complete, the student may be allowed to register for a one year course (with no additional course credit); this should be determined prior to registration. Prerequisite: Psychology 202 and permission of the instructor.

One-half course credit, each semester (or year).

Course Descriptions—300's Advanced Level

310. Special Topics: Various topics at the advanced level may be offered from time to time.
- No PSY 310 courses will be offered in 2004-2005

320. Advanced Developmental Psychology (Old Psych 310. Special Topics: Narrative Psychology)
In this seminar specific topics of human (child and adult) development will be studied in depth. The topics covered will reflect contemporary issues and methodology in the field and currently focus on narrative psychology. Students
will design and carry out an experimental (qualitative) or observational project in collaboration with the professor. *Prerequisites: Psychology 201, Psychology 220 or 221.*

One course credit, spring semester.

**322. Advanced Social Psychology (Old Number PSY 80)**
Students will cover a particular area of research in social psychology in more depth than is possible in a survey course. The topics covered will reflect contemporary issues in the field and may differ in different semesters. The course will cover primary research and theoretical works. A research proposal will be constructed, and students may carry out a research project in collaboration with the professor. *Prerequisite: Psychology 202 and Psychology 222.*

One course credit, spring semester.

**323. Advanced Abnormal Psychology (Old Number PSY 323: Human Change Processes)**
This course is designed for students who have taken Abnormal Psychology (Psychology 223) and are interested in learning about treatments for psychological disorders. The three main approaches that are studied are: psychopharmacology, psychotherapy, and mindfulness. Emphasis is on an empirical evaluation of treatment effectiveness, and the search for the Common Factors that underlie all successful human change efforts. *Prerequisites: Psychology 223; Psychology 201 (may be taken concurrently).*

One course credit, spring semester.

**331. Advanced Cognitive Psychology (Old Psych 310. Special Topics: Repressed Memory and Eye Witness Testimony)**
This seminar course is designed for students who have completed Cognitive Psychology (Psychology 231), and are interested in developing and testing their own ideas about memory and other cognitive processes. The specific topic may vary from year to year, but will typically focus on a contemporary issue in the field of memory, such as memory distortion. Students will design and carry out a research project in collaboration with the professor. *Prerequisites: Psychology 201, Psychology 231.*

One course credit, spring semester.

**333. Advanced Physiological Psychology (Old Number PSY 81)**
Students in this course will become involved of research in an area of physiological psychology or developmental psychobiology. The topic covered will
reflect contemporary research issues in the field and may differ in different years. A major course component will be collaboration with the professor in designing, conducting, and writing up an experiment that is directed toward possible publication. Prerequisite: Psychology 201, Psychology 233 (may be taken concurrently), Biology 101 or 111).

One course credit, spring semester.

387, 388. Advanced Research (Old Number 87, 88)
Individual students will work with a faculty member to design and carry out empirical or library research on a topic of their choice. This advanced-level project requires that students become well versed with the primary literature of the field. Prior to registering, the student should discuss his research idea with (and obtain the approval of) the faculty member who will supervise the project. A brief proposal outlining the work to be conducted and an anticipated timetable for completion must be approved by the faculty supervisor no later than two weeks following the first day of classes; students not meeting this deadline must drop the course until a later semester. If the faculty supervisor believes the project will require longer than one semester to complete, the student may be allowed to register for a one-year course (with no additional course-credits); this should be determined prior to registration. Typically, one-half course credit is granted for a faculty directed project. If the student is primarily responsible for designing and carrying out an independent project, a full course credit may be given (this must be determined prior to registration). In either case, completion of the course requires submission of an APA-style written report (to the faculty supervisor) and a 15-minute oral presentation of the project to psychology faculty and students prior to final examination week of the semester the grade is awarded. Prerequisite: Psychology 202, completion of at least one intermediate-advanced course sequence, and permission of instructor.

One-half or one course credit, each semester (or year).

Course Descriptions—400's Senior Level

497. Senior Seminar (Old Number PSY 97)
The focus of the senior seminar in Psychology is to provide students with a broad grounding in the historical roots of the discipline. By the end of the course students should understand and be able to evaluate critically the diversity of viewpoints about human nature and behavior, as represented over the course of psychology's history. Readings and discussion will focus both on the historical foundations of experimental psychology and the principle traditions in the history of personality theory and psychotherapy. All students will complete a major research paper on a topic of their choosing. Prerequisite: Senior standing as a psychology major or minor.

One course credit, fall semester.
TEACHER EDUCATION PROGRAM

Faculty: D. Butler, Director; M. Pittard; R. Burgess

#Part-time

Indiana Teacher Licensing Requirements for Adolescent and Young Adult License

The mission of the teaching program reflects the College mission. The program is designed to encourage reflection about teaching from a sound basis in the liberal arts. Specifically, it is the mission of the program to help educate teachers who remain knowledgeable in their field and are able to communicate knowledge to adolescents effectively, are able to ponder the complex missions of education and are sensitive to the diverse population they serve, work creatively with students of varied motivational levels within the complex social environments of the classroom, can energize students and colleagues for individual improvement and systematic educational change, can bring a fresh perspective to the classroom for the sake of a productive and operative tension in the workplace, and are creative problem-solvers in their disciplines and in their approaches to education. Such students become liberally educated professionals in education.

Students planning to enter the Teacher Education Program should follow the general education and subject area or content requirements for the academic year in which they enrolled. General education and subject area or content requirements have been changed to meet new standards and assessments and those described in this Academic Bulletin apply to the entering class in fall 2002 and those thereafter, and to program applicants beginning in the spring, 2003. All education classes now listed apply to those in the program currently as well.

A student who is fully admitted to Teacher Education should have completed Educational Psychology, PSY 101 and Education 101, and should meet the following requirements by the end of his sophomore year:

1. Be a rising junior
2. Have attained a 2.50 GPA
3. Maintained a grade of C or better in each course in the major that is required by the teaching program
4. Received a recommendation from the Dean of Students based on satisfactory college citizenship
5. Passed the PPST Tests required for program entry
6. Submitted an acceptable portfolio for program entry

To be retained the student must continue to meet the standards described in items 2, 3, and 4 above. At the end of the first junior semester, he should have completed Education 201 with a grade of C or better.
To be accepted for student teaching, a student must have completed Education 302 with a grade of C or better, and continued to maintain all preceding requirements along with submission of a teaching analysis portfolio. To be retained during his senior year, he must (1) complete Education 400 and Education 401-07; (2) satisfactorily complete the senior interview; (3) continue to maintain other requirements.

To become licensed to teach, a student must have; (1) completed remaining education and teaching major courses with the grade of C or better in each; (2) completed student teaching with recommendations to teach from the director of Teacher Education; (3) passed all NTE tests at the level required by the State of Indiana; (4) completed satisfactorily a program portfolio (5) maintained all preceding requirements.

A student taking Education 101 must list the director or other education faculty as his co-advisor during preregistration of the same semester. A student seeking admission to Teacher Education during the spring of his sophomore year must list an education faculty member as his co-advisor.

For more detailed information, students should see the Director of Teacher Education.

In addition to content requirements listed below, the program in Teacher Education specifies a number of General and Professional Education courses (Psychology 101, Education 101, 201, 302, 400, 401-7 (one course), and Education 420, 422, 487, and 488 for those through the entering class of Fall 2003). Students complete a 11-week full-time practice teaching program during the spring semester of the senior year, unless completing requirements under the Ninth Semester Option. Those interested in the Wabash Transition to Teach Program should contact the Director of Teacher Education for information on this option since the courses they take are slightly different from those listed above.

Wabash College teacher education program completers passed Title II required Indiana license tests with 100% passing rate on the Prax's I tests in the most recent year. For further information, please contact the Director of Teacher Education.

General Education

Candidates will meet the college distribution requirements in language studies, literature and fine arts, composition and quantitative literacy abilities, math and sciences distribution, and social science distribution along with C & T 201, and 202, foreign language requirements, and Freshman Tutorial requirements.

Within this requirement, the candidate will need to take: Speech 101, or where appropriate and advisable, Theatre 105; an additional course beyond English 101 in prose writing (English 201, 213, 410, 411, or 413). A psychology course addition to Psychology 101 is strongly recommended for the secondary education pattern, especially courses such as Psychology 102, 211 (Cross-Cultural Psychology), 220, 222, 223, or 231.
DIVISION III, THE SOCIAL SCIENCES/TEACHER EDUCATION PROGRAM

**Professional Education:** Psychology 101, Education 101 (both together constitute Educational Psychology), Education 201, 302, Education 400, Education 401-7 (one course from these), 420, 422, and 487 or 488 (one half credit for education observations for those seeking licensing through the entering class of Fall 2003). In addition there are special topics in education, Education 230, 330, or 430 and independent study possibilities, Education 387, 388, 487-488.

**Subject Matter Concentrations:** See requirements listed by division and department below.

**Note:** Language Arts teaching candidates may cross-list English 201, 410 and 411 as Education 201, 410, or 411.

**Course Descriptions**

**101. Introduction to Student Development**
A field based study of the K-12 spectrum of student development, with a focus on observing how teachers teach differently to developmental levels of students, *and on the roles of the family and community in student development.* The course covers "child and adolescent development through the school perspective." Students will be learning a variety of techniques of observation used by the education researcher, discussing their observation and insights, and reading and studying key developmental concepts. Students will compose an autobiography of themselves as an example of writing narrative inquiry. The technology thread required includes use of the computer to create word documents, send email and us Blackboard effectively. The field component is 25-hours at K-12 schools, *and ten hours with a family and/or community service.*

*Level: Freshmen and Sophomores.*

One-half course credit, spring and fall semesters.

**201. The American High School: A Social History Behind the Current Issues**
Key Inquiry: How did high schools become the institutions we have today? The course includes the history and philosophy of American schooling from colonial and common school times to the present, focused on he rise of high school in particular. The historical and philosophical components will be integrated with a study of contemporary educational issues of school reform and will include the history of schooling for diverse multicultural groups. A variety of contemporary issues driving the current schooling reform will be studied including: multicultural, bi-lingual, and special education reforms and their impact on the high school; curricular reform (including multidisciplinary, interdisciplinary curriculum); and issues around the reform of instruction and assessments in the education of high school students. The required technology thread includes effective internet searching along with PowerPoint presentations. The
Division III, The Social Sciences/Teacher Education Program

Field component contains field trips to innovative schools and working with special needs students.

*Level: Open to any student; required of juniors admitted to the program.*

One course credit; fall semester.

302. Teaching Adolescents in the High School

The course is the first instructional one in the program. It includes a study of methodologies used in culturally responsive instruction and assessment for a diversity of students (ethnicity, gender, class, and special needs). Students will learn to plan instruction, and will implement these plans while teaching locally as well as at an urban area high school. The technology introduces students to more foundations for using technology in instruction. Required observation in local high school are followed by teaching in area schools, and urban observation and teaching.

*Level: Admitted Juniors only, except by permission of the Director. (Students who are planning to go abroad and into education also would be encouraged to take this course either as sophomores along with the Education 201 course described above or to take the fall section of Education in the junior year).*

One course credit; spring and fall semesters.

400. Adolescent Literacy and Learning in the Content Areas

Building on Education 302, which will reinforce content perspectives on general methodologies, this course will focus on the integral role of literacy in the teaching and learning of the content areas. Students will be introduced to the major theories of literacy learning as well as current research on adolescent literacy teaching and learning. As part of an introduction to the concept that classroom research is a viable method for ongoing professional growth and development in all content areas, the course will take both field-based and inquiry-based approaches. Students will conduct a field based literacy inquiry project that enables them to better understand the challenges and benefits of teaching and learning literacy in their content fields. In addition, the field experience will also culminate in the development of a team-planned unit that will be taught in the course.

*Level: Admitted seniors only.*

One half course credit, fall, senior semester.

401-407. Special Methods (Old Number EDU 06)

Each special methods course builds upon the previous course in literacy, enabling the student to further examine the methods and pedagogy specific to his
division. The course will cover the remaining Indiana content standards and introduce students to the Indiana P-12 standards, while examining the methods and procedures particular to each discipline in both classroom and field-based settings. Using the inquiry-based model introduced in Education 400, students will create a proposal for a field-based inquiry project to be conducted later in student teaching. The course is team-taught by liberal arts and high school faculty who will mentor candidates in their field-based experiences (practice in teaching) and with the initial development of the inquiry project. Laboratory experiences at the secondary level are required.

401. Teaching of Language Arts (English and Speech)

402. Teaching of Mathematics

403. Teaching of Laboratory Sciences

404. Teaching of Social Studies

405. Teaching of Foreign Languages (Modern)

406. Teaching of Latin

407. Teaching in Theatre

Prerequisite: Educational Psychology 101, Education 201, 302, 400, senior standing and admission to the Teacher Education Program.

Level: Admitted students only. (Courses may be offered at a different semester for Transition to Teach students).

One-half course credit, second half of fall semester.

420. Content Pedagogy Seminar

During the period on campus prior to the beginning of student teaching, and continuing through the semester, the student teacher will continue his study of pedagogy by examining themes shared across content areas such as classroom management models, legal and ethical issues of the profession, and examination and exploration of the professional associations. Candidates will also examine professional journals and sites, as well as further their abilities to make sensible use of technology in their content instruction. In this seminar the student teacher will start developing instructional plans for his student teaching, and as well, receive support from faculty and cooperating teachers to further develop the inquiry defined in the education special methods course. Some field experience hours in the student teaching classroom required.

One half course credit, with student teaching, fall or spring semester (Fall for Ninth Semester Option students only).

Prerequisites: all previous courses in teacher education.
422. **Student Teaching**

The purpose of this course is to bridge the gap in teacher education between theory and practice. It will be an 11 week, full-time experience in classroom teaching at the secondary school level under the supervision of a public school teacher. At the end of student teaching, the student teachers will devote time to reflection and consultation with field supervisors and education faculty as the student teacher finalizes his classroom inquiry project and other program exit requirements.

Two and one half credits, spring or fall semesters (Fall for Ninth Semester Option students only).

421. **Student Teaching (used for Transition to Teach students only; Old Number EDU 11)**

The purpose of this course is to bridge the gap in teacher education between theory and practice. It is a ten-week, full-time experience in classroom teaching at the secondary school level under the supervision of a public school teacher. Preliminary sessions in classroom management and other topics are required as well as capstone assessments. Used only for Transition to Teach candidates.

Two course credits, spring semester.

230, 330, 430. **Special Topics in the Study of Education (Old Number EDU 87, 88)**

Open to any study with the permission of the director of Teacher Education.

One-half to one course credit.

387, 388, 487, 488. **Independent Study (Old Number EDU 87, 88)**

Open to any student with the permission of the director of Teacher Education. (Also used for all field experiences and entitled “Observation in the High School.”)

One-half to one course credit.
Content Area Courses Requirements for Teaching at the Adolescent and Young Adult Licensure Level

Division I/Mathematics and The Sciences

Indiana Teacher Licensure Requirements for Science: Candidates for teaching the Sciences at the Adolescent and Young Adult level must complete, beginning with the entering class in 2002, one of the following areas:

Science/Biology
To meet the new standards and assessments for a Science Teaching License with Life Science as the concentration for sciences at the Adolescent and Young Adult level, the candidate must have fulfilled the department's requirements for a major in Biology to include the course in Earth Space Sciences (Division I—301 or 302). In addition it is recommended that the candidate take at least one more course in Chemistry and Physics. Sophomore teacher education applicants for the Life Science Teaching License should have taken at a minimum, Biology 111 and 112 by the spring of the sophomore year so that they can submit work to be assessed in their portfolio reviews for program entry.

Content assessments will include evidences of content work in the education portfolios, including laboratory and science research pieces of evidence; grades of C or above in the courses required for the teaching license; passing scores on the NTE test in sciences; pass or above on written comps and oral comps.

Science/Chemistry
To meet the new standards and assessments for a Science Teaching License with Chemistry as the concentration for sciences at the Adolescent and Young Adult level, the candidate must have fulfilled the department's requirements for a major in Chemistry to include these additional courses: Biology 111 and Earth Space Science, Division I 301-302. For this license, it is recommended that the candidate take one more course in Biology and Physics.

Science/Physics
To meet the new standards and assessments for a Science Teaching license with Physics as the concentration for sciences at the Adolescent and Young Adult level, the candidate must have fulfilled the department's requirements for a major in Physics to include these additional courses: Biology 111, Chemistry 111, and Earth Space Science, Division I 301-302. For this license, it is recommended that the candidate take one more course in Biology or Chemistry.
Science/Physical Science
To meet the new standards and assessments for a Science teaching license with Physical Science as the concentration for sciences at the Adolescent and Young Adult level, the candidate should fulfill departmental requirements for either a major in Chemistry or a major in Physics, and the following requirements for the field that is not a major:

Chemistry
Chemistry 221, 231, and 2 and 1/2 additional credits (either to be determined in consultation with the Chair of Chemistry and the Director of Teacher Education, or preferably from 222, 241, 351, or 451).

Physics
Physics 113, 114, 210, and one more full credit course (to be determined in consultation with the Chair of Physics and the Director of Teacher Education).

Sophomore teacher education applicants for the Chemistry, Physics, or Physical Sciences Teaching License should have taken at a minimum, Chemistry 111 and 112 and Physics 111 and 113 by the spring of the sophomore year so that they can submit work to be assessed in their portfolio reviews for program entry.

Content assessments will include evidences of content work in the education portfolios, including laboratory and science research pieces of evidence, grades of C or above in the courses required for the teaching license; passing scores on the NTE test in sciences; pass or above on written comps and oral comps.

301, 302. Earth Space Science (Old Number DIV I 03A, 03B)
A survey of the fields of astronomy, geology, and meteorology designed for those preparing for the secondary school teaching license in a scientific field. The work will be largely on an independent study basis. DIV I 301 and 302 must be taken in order to receive credit. Prerequisite: major in a laboratory science, junior or senior standing, current or past enrollment in Education 201 or 302.

One course credit, fall or spring semester, as needed.

Mathematics
Candidates for teaching mathematics at the Adolescent and Young Adult level must complete, beginning with the entering class of 2002, the required major to include: 111, 112, (unless the candidate has tested out of these courses), 221, 222, 223, 224 or 225, 227, 333, Computer Science 111, and one course from

Sophomores entering the teaching program should already have completed Math 111, and 112 in order to provide appropriate evidences in the sophomore portfolio.

Content assessments will include evidences of content work in the education portfolios, grades of C or above in the courses required for the teaching license; passing scores on the NTE test in mathematics; pass or above on written comps and oral comps.

**Division II/Humanities**

Indiana Teacher Licensure Requirements for Humanities: Candidates for teaching English Language Arts (including Speech), French, German, Latin, Spanish, and Theater at the Adolescent and Young Adult level must complete, beginning with the entering class of 2002, one of the following areas:

**English Language Arts**

For licensure with an English major, the candidate will meet all requirements for the department major, including taking these specific courses for meeting Language Arts teaching standards and assessments at the Adolescent and Young Adult level: three core courses, with at least one in American literature and one in Shakespeare or other dramatic literature (a theater literature course may be used here for this requirement); two intermediate literature courses; English 397; English 497 or 98; one course in multicultural literature (could be an intermediate level class); one course in world literature (Colloquium 401 or 402 may also be used); the additional course in composition, expository or creative; English 122; either 121 or 123; and either English 150 or Speech 240. In addition, candidates for the AYA Language Arts license must take a speech component consisting of Speech 143/145, and 201 along with the general education requirement of Speech 101. Candidates may want to seriously consider taking a speech minor by completing an additional two courses, with one from 320 or 350. Sophomores entering the teaching program should have taken, at a minimum, two English courses and one speech course, including one core class, by the spring of the sophomore year, so they can submit work to be assessed in the entry portfolio review.

Content assessments will include evidences of content work in the education
portfolios, grades of C or above in the courses required for the teaching license; passing scores on the NTE tests in English/Language Arts; pass or above on written comps and oral comps

**Latin**

Candidates for teaching Latin at the Adolescent and Young Adult level must complete, beginning with the class of 2002, the following: Latin 201, 202, 301, 302, 303, 304, 330, 400, and one course from Latin 210 or 387, 388 (9 course credits). In addition, students should take Classics 104 or 106, preferably both.

Sophomores entering the program in Teacher Education need to have taken at least Latin 201 by the time they apply to the program in order to submit a portfolio of appropriate work for this entry assessment.

Content Assessments will include evidences of content work in the education portfolios, grades of C or above in the courses required for the teaching license; passing scores on the NTE test in the appropriate language; pass or above on written comps and oral comps.

**French**

Candidates for teaching French at the Adolescent and Young Adult level must complete, beginning with the class of 2002, the following: FRE 201, 202, 301, 302, 401, and four other literature courses from the remaining courses offered by the department or the equivalent, especially if studying abroad.

Sophomores entering the program in Teacher Education should have taken at least FRE 201, by the spring of the sophomore year in order to submit portfolio of appropriate work for this assessment.

Content assessments will include evidences of content work in the education portfolios, grades of C or above in the courses required for the teaching license; passing scores on NTE test in the appropriate language; pass or above on written comps and oral comps.

**German**

Candidates for teaching German at the Adolescent and Young Adult level must complete, beginning with the entering class of 2002, the following: GER 201, 202, 301, 302, 401, and four other literature courses from the department offerings, or the equivalent especially if studying abroad.

Sophomores entering the program in Teacher Education should have taken at least GER 201, by the spring of the sophomore year in order to submit a portfolio of appropriate work for this assessment.
Content assessments will include evidences of content work in the education portfolios, grades of C or above in the courses required for the teaching license; passing scores on the NTE test in the appropriate language; pass or above on written comps and oral comps.
