Subject: Advising - Chemistry majors
Date: Thursday, April 2, 2020 3:25:01 PM

Dear advisors,

As advising continues, I have heard of some confusion about the recently announced changes to the requirements to the Chemistry major. Particularly important for Fall registration, I'll remind you that Chemistry majors can take *either* PHY-111 or PHY-109. For those students who may be interested in graduate school or in ACS certification for their Chemistry major, it is highly recommended that they choose PHY-111 (and follow with PHY-112).

I am happy to answer any questions, as are other members of the Chemistry Department!

Thanks,

Laura
