

Wabash.

We take the health of our students seriously at Wabash. Our nationally-ranked Student Health Center is staffed with a certified Registered Nurse Monday-Friday, and a board-certified family physician visits Monday through Friday during the academic year. Incoming students are required to provide a health history using our online health records system. This includes mandatory immunization records. International students must have TB testing consisting of a TB skin test or IGRA blood test.

REQUIRED FOR ALL STUDENTS

- Documentation of the following childhood vaccinations:
 - Polio series (IPV or OPV)
 - MMR (measles, mumps, rubella) – two doses
 - The first dose must be given on or after the first birthday; the second dose at least 28 days later than dose #1
 - Titers may be submitted as evidence of immunity
 - Tdap (tetanus, diphtheria, acellular pertussis) – In addition to completion of the primary series, one dose within at least 10 years of enrollment date
 - Varicella (chicken pox) – two doses of vaccine OR laboratory proof of immunity for those with a history of disease
- Meningococcal ACWY (also called MCV-4) – two doses
- Influenza (if you can get a flu shot prior to arrival on campus, wonderful; otherwise, we make flu shots available for all students, staff and faculty each fall)

STRONGLY RECOMMENDED FOR ALL STUDENTS

- HPV (human papillomavirus) – 2 or 3 doses depending on age at first administration
- Meningococcal B – two doses
- Hepatitis A – two doses
